

Data Protection Policy

Buskoll is an application that helps you keep track of what needs to be done.

All data is securely stored and sent in protected form between the clients (e.g., mobile phones) and the central database.

Buskoll doesn't save any personal user data besides the e-mail address that is tied to the account and part of user's login credentials. If the account is terminated all of the user's data is deleted including the user's e-mail address.

We hope that you will feel confident in using Buskoll and are satisfied with the support Buskoll provides.

However, it is our duty to inform you that if unauthorized individuals obtain access to the data it can potentially be harmful for you and your business, if you have several users.

Therefore, we strongly recommend that you do not share your login information with anyone and that you protect access to your mobile phone or computer.

Furthermore, we would like to inform you that Milso AB cannot be held liable for damage caused to users as a result of using Buskoll.

Find out more under "Terms of Use".
